SEXUAL HARASSMENT ON THE JOB IS A PROBLEM FOR MANY WORKING WOMEN

- * Is someone coming on to you who won't take no for an answer?
- * Is it beginning to interfere with your work?
- * Is he always touching or putting his arm around you and other women at work?
- * Do your boss' sexual jokes and comments on your appearance make you uncomfortable?
- * Would you like to tell him off but are afraid you'll lose your job?
- * Does he have a reputation as the office "playboy" but the company looks the other way when women complain?
